## Abortion Recovery InterNational Designates April as Abortion Recovery Awareness Month!

April is Abortion Recovery Awareness Month™ (ARAM) as designated by Abortion Recovery International, Inc.

Abortion Recovery Awareness Month (Abortion Recovery Month) was established in 2005 to encourage and extend healing opportunities to individuals and families hurting from an abortion experience.

During the month of April, Abortion Recovery InterNational encourages Christians, around the globe, to enlighten society by reaching out to individuals and families within their community.

Stacy Massey, Abortion Recovery InterNational President and Founder, states:

*“One abortion, through a ripple effect, may touch the hearts of 40-50 people in a lifetime. We, as a society, are not always prepared on how to help! Our staff, volunteers and affiliates are here to assist ... not only those hurting, but to educate society and the church”!*

An Abortion Recovery Awareness Calendar for the month of April is established each year providing ideas and resources to promote healing for those hurting. ARAM is secular-friendly. It is free of condemnation, judgement or negative connotations. It has NO political agenda.

The ultimate goal is to share **Compassionate Abortion Recovery Efforts** with others and offer help, healing and hope!

Visit the ARAM website to see the April calendar, a line of awareness products and read the endorsements from community leadership.
