RE: Why men, why abortion?

Dear Friend,

I wanted to write you today a letter regarding the value and importance of considering the stark reality that abortion is not only a woman's issue.

If it is true our Supreme Court of the United States provided women the protection to pursue abortion legally in this country and forty five million children have perished then it is also true that nearly ninety million fathers and mothers have also suffered the intense trauma of being part of an abortion personally.

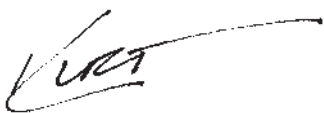

Simply stated 1 out of every 4 men attending church regularly today has been part of this dilemma. The incredible personal drama is leading men to broken marriages, alcoholism, rage and even suicide.

Most exciting is ARIN (Abortion Recovery International) is doing tremendous work to stem the tide of the personal captivity many men find themselves in as prisoners of their long standing guilt and shame.

Through speaking engagements, resources and a myriad of services ARIN offers, men are finding the path to freedom from the pain they have carried for so long.

I encourage you to consider learning more about the wonderful ministry know as ARIN.

Regards,

Kurt Ramspott
